ABHISHEK SINGH

Faridabad, Haryana +91 8700682998 abhisheksingh89208@gmail.com

SUMMARY

Software Development Engineer with 3+ years of experience in Web Development/Python-based test automation, protocol-level validation, and product engineering for embedded and storage systems. Strong exposure to SSD protocols (SATA/SAS/NVMe), stress & performance testing, debugging & failure analysis, and end-to-end test lifecycle ownership. Proven ability to collaborate with cross-functional teams, analyze field issues, and deliver high-quality, reliable systems.

EDUCATION

J.C. BOSE UNIVERSITY OF SCIENCE & TECHNOLOGY, YMCA — Faridabad, Haryana
Bachelor of Technology – Computer Science & Engineering — Aug 2022 - Expected May 2026
Cumulative GPA: 6.9/10
Relevant Coursework: Data Analysis, Software Engineering, Operating System, Algorithms, ML

AGGARWAL PUBLIC SCHOOL | CBSE — Ballabgarh, Haryana
12th Non-Medical; 60% — Jul 2021- Jul 2022

EXPERIENCE

Voltas Limited – A TATA Enterprises — Mumbai, Maharashtra
Software Engineer Intern — April 2025 – Aug 2025

- Contributed to the development and enhancement of **software modules for LG products**, working with technologies such as **Python, C/C++, Java, and embedded frameworks.**
- Assisted in building and testing application features for consumer electronics and smart devices, ensuring high performance and reliability.

PROJECTS

TIME MANAGEMENT STSTEM | Full Stack AI project — Sep 2025 – Nov 2025
Technologies: HTML, Django, MySQL, AI

- Developed a web-based Time Table Management System to automate scheduling for institutions.
- Used Django framework for backend logic, authentication, and data handling.
- Designed a structured MySQL database schema for courses, faculty, classrooms, and time slots.
- Implemented AI-based logic to reduce timetable conflicts and optimize resource allocation.

ALUMNI PORTAL | Full Stack Project — Mar 2025 – May 2025
Technologies: HTML, CSS, JavaScript, PHP, Bootstrap, Database (MySQL)

- Designed and developed a responsive Alumni Portal using HTML, CSS, Bootstrap, and JavaScript for seamless cross-device access.
- Implemented secure user authentication and role-based access (Admin, Alumni, Student) using PHP and MySQL.
- Built dynamic modules for alumni registration, profile management, and networking.
- Integrated CRUD operations to efficiently manage alumni records and event data.

SKILLS

Languages: Java, Python, C++
Backend: REST APIs, Microservices, Distributed Systems
Protocols: SATA, SAS, NVMe (theoretical + practical exposure)
Databases: MySQL, PostgreSQL, DynamoDB
Test Types: Compliance Testing, Stress Testing, Performance Testing, Regression Testing
Cloud: AWS (EC2, S3, Lambda, CloudWatch)
DevOps: CI/CD, Git, Docker
